

PP-YOLO customise data training

02.07.2021

For pp-yolo customise data training I am facing this error.

The screenshot shows a Google Colab notebook titled "pp-yolo.ipynb". The left sidebar displays a file explorer with a tree view of the notebook's contents, including folders like "bin", "boot", "content", "datalab", "dev", "etc", "home", "lib", "lib32", "lib64", "media", "mnt", "opt", "proc", "root", "run", "sbin", "srv", "sys", and "tensorflow-1.15.2". The main area shows two code cells. Cell [1] contains a command to mount a Google Drive folder:

```
%cd ..
from google.colab import drive
drive.mount('/content/gdrive')
```

 Cell [2] contains a command to install PaddlePaddle:

```
python -m pip install paddlepaddle-gpu==1.8.4.post107 -i https://mirror.baidubce.com/pypi/simple
python -m pip install paddlepaddle==1.8.4 -i https://mirror.baidubce.com/pypi/simple
```

 The output of cell [2] shows a list of requirements and their status, indicating that the installation is successful. The bottom status bar shows "2s completed at 10:16 PM".
